Abstract (en)

[origin: WO2005064549A1] The invention relates to a bank note processing machine and to a method for identifying forged bank notes. According to said method, the bank notes to be verified are compared with comparison data that is derived from genuine bank notes and known forgeries, additional comparison data being used for recent forgeries. The bank notes to be verified are then compared both with the comparison data and the additional comparison data for recent forgeries in order to determine the existence of a forged bank note.
