Abstract (en)
[origin: FR2864676A1] The device has angle irons holding a double sided panel by a fixation screw and nut. Each iron has an end, which is opposite to the panel, for holding upper part of a spring (4) using a screw (7) on a pin (8). Each spring has a lower part fixed on a magnet (5) protected by a cap (6). The irons induce traction force on the springs on the wind side and thrust force on the springs on the side opposite to wind.
