Abstract (en)

[origin: WO2005064751A1] A connector device (10), for the production of an electrical connection between a mains cable (50) and a loom (30) in an electrical device, in particular, a domestic device, is disclosed, comprising a first plug-in connector (13), for the production of a detachable, mechanical and electrical connection to the loom (30) of the electrical device and a second plug-in connector (11), for the production of a detachable, mechanical and electrical connection to the mains cable, whereby the second plug-in connector (11) is provided for a number of differing mains cables and has an identical connector configuration for each of the differing mains cables.
