Abstract (en)

The article has a film (2) comprising magnetic particles oriented as a visible pattern, and an adhesive surface defined by an adhesive layer. The film (2) is obtained by drying a film-forming material containing a solvent. A protective film (9) is covered on a surface of the adhesive layer. The film (9) sticks around the film (2) in a manner so as to assure the fixation of the article on the skin, fingernail or artificial fingernail. Independent claims are also included for the following: (1) a method of fabricating an article destined to be fixed on keratinous materials such as the skin or fingernails (2) an assembly comprising an article and a device for packaging articles (3) a make-up method.
