Abstract (en)  
Sliding mechanism (10) for a furnishing element (11), comprising a wheel (14) rotatable on a pin (13) which is provided, at one end, with a first threaded part able to be screwed to the furnishing element (11) and, at the other end, with a head. The pin (13) also comprises a second cylindrical part which is disposed between the threaded part and the head, and which has a diameter substantially equal to the inner diameter of the wheel (14).
