Abstract (en)

[origin: EP1700727A2] The device has a draw bar (31) movable between rest and occultation positions and comprising a flap (32) movably mounted around an axle (33) relative to the bar such that the flap is folded and deployed in the rest and occultation positions, respectively. The flap is folded in a housing provided in the bar in the rest position, and deployed outside the housing, due to the effect of a spring (36), in the occultation position. An independent claim is also included for a motor vehicle having a device for occulting a portion of a surface of a motor vehicle.
