Abstract (en)

[origin: EP1700793A1] The assembly has a cosmetic product dispensing device with a container containing a cosmetic product to be dispensed, a propellant and a valve allowing the distribution of the product, when it is actuated. A protective cover (20) partly surrounding the device has several identical or different textile layers having meshes. The cover is extensible and has mechanical resistance properties. One of the textile layers has a napper structure. The cover has aluminum fibers.
