Abstract (en)

[origin: EP1700803A1] The device has an opening drum (1) with a circumferential part that engages in a rotating area of a gripper drum. The circumferential part has a guide unit (12) that is moveable in a circumferential direction of the drum (1). The guide unit transports the partially opened paper sheets to another opening drum. The guide unit has two rollers that are supported in an integrated retainer and at a lateral distance to each other.
