Abstract (en)  
A washing machine for domestic use, in particular a laundry washing machine, is described which comprises: a wash tub adapted to contain a certain quantity of laundry; means for containing and dispensing washing agents, comprising at least one compartment; means for supplying water from the main to the wash tub, comprising valves for selectively conveying the supply water into said at least one compartment; means for managing and controlling the washing machine, adapted to store and select at least one wash programme, said wash programme comprising one or more phases (prewash, wash, bleaching, softener, etc.) for washing laundry. The invention is characterized in that said washing machine is provided with at least one programme being specifically dedicated to the dyeing of laundry inside said washing machine and comprising phases which optimize the dyeing and fixing process according to the type of laundry loaded in said machine.
