Abstract (en)
[origin: EP1700948A2] A rope for individual safety devices, being made up with a central core (1) and a sleeve or covering (2) around the core made up of a multitude of threads helicoidally braided in two directions, having the sleeve or cover (2) an internal reinforcement (4) to the braiding made up from a multitude of longitudinally arranged threads throughout the length of the rope (3) that form a path that is substantially sinusoidal which depends on the relationship of the tensions between the threads making the internal reinforcement (4) and the threads making up the braiding of the sleeve or cover (2).
