Abstract (en)

[origin: EP1700960A2] The system has a frame supported on posts (2) that are designed for a height adjustment of the system and comprising a fastening unit for a cistern that is accommodated between the posts. Retaining units (6) are provided at the frame for a wall assembly. The frame is assembled in different angle positions relative to walls of a building corner. Latches are fastened at the frame, where the frame is fixed at the wall by the latches.
