Abstract (en)
[origin: EP1701123A2] The heating body has a fluid line leading to a common channel (1), especially for the fluid feed, arranged in the forward line or the return line, at least one freely protruding drying tube (80) terminated at its free end and a flow controller near a connection point of the drying tube protruding into the cross-section of the common channel or fluid line to divert the fluid flow, especially partially, into the drying tube.
