Abstract (en)
[origin: EP1701228A2] The watch has a middle (7) with a metal outer ring (8) surrounding an inner ring (9). Contact surfaces (5, 6) of a glass (1) and a back (2) are fixed respectively to the upper and lower surfaces of the ring (8) using an anchoring agent. The ring (9) is held between the contact surfaces and extends radially inwards of the watch to suspend a clockwork movement such that the watch is transparent in an annular zone (15) around the movement.
