Abstract (en)
[origin: WO2005055726A1] The invention relates to an apparatus for producing waffles (2). Said apparatus comprises a waffle iron having upper and lower frying plates (4a, 4b). An actuator (6) is arranged for opening the waffle iron for filling of waffle mixture, for closing the waffle iron for frying the waffle mixture, and for opening the waffle iron for removing the produced waffle. A batch container (24) is arranged to receive dry waffle mixture from a powder container (10) and liquid supplied from a liquid line. The batch container (24) is arranged on a weight cell (27) for weighing up desired masses of dry waffle powder and liquid. A whisk (26) is arranged to blend the waffle mixture and a motor (29) is arranged to turn the batch container (24) for pouring the blended waffle mixture in the batch container (24) into the waffle iron for frying. The claimed method includes a washing step for the batch container (24) and the whisk.
