Abstract (en)  
[origin: EP1702602A1] An internal coating in plastic material for a container, particularly made of wood, comprising a bowl shaped base, destined to coat the bottom and side walls of the container, and a cover, destined to be covered in turn by said cover element of the container. The bowl shaped base can be erected from a cut-out (1) obtained from a first sheet of plastic material, whereas the cover (15) is obtained by moulding from a second sheet of plastic material. The bowl shaped base, once erected, is capable of supporting and retaining the cover (15), which is liable to be welded to the edges of the bowl shaped base.
