Abstract (en)
[origin: EP1702658A1] The device has a locking mechanism cooperating with a connecting bar (16). An opening system has a lever (38) that is articulated by its front articulation end on a base (12). The system has a slide (44) whose rear end is connected to a head (30). The slide directly controls the opening of the mechanism when it is handled downwards. The lever controls the opening of the mechanism through the slide when the lever is handled upwards.
