Abstract (en)
[origin: EP1702850A2] Device for folding-in folding crates (1), wherein in two opposite first walls said folding crates (1) are provided with locking means to lock the unfolded position, in cooperation with connecting second walls, wherein the device comprises a conveyor (12) for moving the crates through the device according to a process path, as well as deactivation means to deactivate the locking means by engaging the locking means, and defining means to define a height dimension of the folding crates, wherein an engagement level of the deactivation means with respect to a reference plane, such as the conveyor, is adjustable in response to a height level defined by the defining means.
