Abstract (en)

[origin: EP1703043A2] The bar unit has a locking bar including a passage opening for a lock striker plate. A striker plate stopper is arranged in the area of the opening. A sliding surface (8) is pre-arranged to the stopper, where the plate slides along the course of a locking movement on the surface. The surface is formed by a separately designed sliding profile (9) made of plastic. The profile is arranged before the plate and is fastened to a door frame.
