Abstract (en)
[origin: WO2005054389A1] The invention relates to an adhesive material. The adhesive material comprises a first layer and a second layer. The first layer is a thermo-activated adhesive material which has a static glass transition temperature TG,A or a melting point TS,A of at least +30 DEG C, and the second layer is a polyacrylate adhesive material which has a static glass transition temperature up to a maximum of +15 DEG C.
