Abstract (en)
[origin: WO2005059271A1] Disclosed is a transversal bolt (1) that is to be fastened to a formwork element (110, 120) of a concrete formwork (100), preferably a curved concrete formwork. Said transversal bolt (1) comprises a first final section located at a first end of the transversal bolt (1) in the longitudinal direction thereof, at least one elongate hole, and at least one round hole. Also disclosed is a curved concrete formwork comprising formwork elements (110, 120) that are provided with such a transversal bolt. A bolt fixture (2), by means of which the transversal bolt (1) can be fastened to the formwork element (110, 120) of the curved concrete formwork, is arranged on the transversal bolt. The elongate hole (3) and the round hole (4) are located next to each other in the first final section of the transversal bolt (1), preferably from the perspective of the longitudinal direction of the transversal bolt (1).
