Abstract (en)

[origin: WO2005067292A1] Disclosed is a user interface for processing displayed objects. A user interface method for navigating displayed objects and selecting an object among the objects in accordance with an embodiment of the present invention comprises the steps of grouping a predetermined portion of selectable objects into a block, mapping the selectable objects to selection input keys of the user input device, and activating an object among the selectable objects by the selection input key.
