Abstract (en)

[origin: WO2005055612A1] Provided are a method and apparatus for video encoding, in which an encoding mode is rapidly decided and video encoding is performed in the decided encoding mode. The method for video encoding includes determining whether a predetermined block of a predetermined size forming a video satisfies predetermined conditions corresponding to a first mode that is included in a plurality of encoding modes used to encode the video and choosing the first mode as an encoding mode of the predetermined block if the predetermined conditions are satisfied.
