Abstract (en)  
The box has a cover (17) with a locking mechanism (19), and a fastening device (21) encompassing a carrier (3) for fastening the box. An end area of the device is guided by an opening, and has a recess. A locking arrangement (31) is arranged with a lock at an inner surface of the box. The arrangement is accommodated in a release and locking position, and intervenes in locking position with lock in the opening of an area of the device.
