Abstract (en)

The tool or set of tools has a switch pusher built in a tool housing. The switch pusher includes a switch casing in which electrical or electronic switch components are arranged and stored. A guide portion (22) is formed and extended at the top edge portion (24) of the switch pusher for guiding the switch pusher into the housing during intended switch pusher manipulation and movement. The guide portion of the switch pusher is formed conforming the guide portion formed on the housing.
