Abstract (en)  
[origin: WO2005070722A1] The invention relates to a steering column switch comprising at least one switch lever comprising an actuating element and the inner side thereof is provided with a gate which is adjacent to a support wherein at least one microswitch is arranged. A tappet, which is guided in the support, is in contact, by means of an end thereof, with the gate and with the microswitch, by means of the other end thereof.
