Abstract (en)

[origin: WO2005068754A1] The invention relates to a bearing pin (1) for locking pieces (2, 21, 22), in particular a motor vehicle door lock (3). The locking pieces (2, 21, 22) are at least partially rotationally mounted on the bearing pin (1) forming a bearing axis (L). A carrier plate (4) which is made of a shape-retaining material, in particular metal, and which supports at least one locking piece (2, 21, 22) is provided. A clip-shaped form (41) is formed in essentially the axial direction of the bearing axis (L). The bearing pin (1) is formed by means of plastic extrusion coating (5) about the clip-shaped form (41). The invention also relates to a motor vehicle door lock (3) comprising locking pieces (2, 21, 22) which are mounted on a carrier plate (4), whereby at least one of the locking pieces (2, 21, 22) is mounted on one such bearing pin (1).
