Abstract (en)
[origin: WO2005057021A1] A hydraulic controller arrangement is disclosed, for the supply of a hydraulic user with pressure medium, for example, the slewing gear of a mobile working machine. The pressure medium flowing out from the user at low pressure medium flow rates is restricted by means of a drain restriction valve, embodied as a pressure-limiting valve, such as to generate a back-pressure which restricts a slipping forward of a mass manipulated by the hydraulic user.
