Abstract (en)  
[origin: WO2005066547A2] A cooking device has at least one pre-set parameter for at least one predetermined programme, such as a cooking programme and/or cleaning programme, and/or for at least one predetermined mode of operation, such as a cooking mode of operation or a cleaning mode of operation. The preset parameter can be modified by means of at least one modification function element of a control element of the cooking device. During a particular time period, the modification can be confirmed, accepted and/or stored by means of at least one confirmation and/or storage function element of the control element of the cooking device, and after the particular time period has elapsed, the modification can be confirmed, accepted and/or stored automatically by the cooking device.
