Abstract (en)  
[origin: WO2005074108A1] The invention relates to a modular linear motor comprising:, - a number of magnets of alternating polarity placed successively in a plane; - at least two successively placed coil modules, which modules comprise a stack of parallel plates of identical form, each provided with at least three parallel fingers, and electric coils arranged round the fingers; wherein the at least two modules are arranged at a distance from each other.
