Abstract (en)
The system has simulation rooms enclosing four wall units (10, 11, 12, 13). The units (12, 13) are movable relative to the units (10, 11) to adjust the size of the surface area of the rooms. The unit (11) has mounting holes for attachment of simulation bodies that furnish the rooms. A door simulation unit (19) is adjustably arranged on the unit (13) and has adjustment units to adjust the size of door openings.
