Abstract (en)

[origin: EP1707357A2] A fabric supporting frame (2) of a screen for flat screen printing comprises a substantially right-angled quadrangular perimetric element, with which it is possible to rigidly associate the perimetric edge (3) of a flat screen printing screen fabric and which comprises a portion (7) which can be associated detachably with a supporting structure (4) of an apparatus or machine for manufacturing the screen or for screen printing substantially flat elements, and at least one element (9) for fixing and centering with respect to the supporting structure (4) which is formed in the portion (7).
