Abstract (en)
[origin: EP1707688A1] A swiveling work machine includes a traveling apparatus (3), a swivel base (19) mounted on the traveling apparatus to be pivotable about a vertical axis (X), a hood (15) disposed at a rear portion of the swivel base, the hood accommodating therein an engine and a support frame (55) disposed across over the engine, and a rollover protection structure (ROPS) (17) having a front end thereof fixed to the swivel base and a rear end thereof fixed to an upper portion of the support frame. The support frame (55) includes a front leg member (59) disposed on one lateral side of the ROPS, the front leg member (59) extending to the vicinity of a front end of the swivel base.
