Abstract (en)

Sealing arrangement comprises a profile strip (9) assigned to an insertion part and a sealing flat material strip which extends from the profile strip over a joint (23) between the profile strip and the insertion part towards the insertion part and seals the insertion part. Independent claims are also included for the following: (1) Profile strip for forming a sealing arrangement on a door or window frame part; and (2) Method for producing a seal in a door or window frame part. Preferred Features: The profile strip contains a connecting unit for a surface layer of a building wall. The connecting unit is embedded in the surface layer. The flat material strip is arranged with sections spaced from each other in the traverse direction with the edge sections lying opposite each other in the longitudinal direction on the insertion part.
