Abstract (en)

[origin: EP1707758A1] The component (1) has an edge-sided flange (3) with through-holes (5, 5') for receiving fasteners, which are provided for making a connection with the component. The flange has other through-holes additional to the through-holes (5, 5') for increasing elasticity, where the later through-holes are not provided for receiving the fasteners. The later through-holes are formed as slots (10, 15) or holes (13).
