Abstract (en)

[origin: WO2005068300A1] An arrangement in a waste container furnished with replaceable refuse sack (6) and having a body supporting the refuse sack from the inside, the purpose of which is to keep by use refuse sack (6) open substantially in its largest size, when the refuse sack (6) is together with the said body fitted into a bin construction suitable for the purpose. The inside body is formed of walls of plate construction or, for instance, of net construction (2, 3), of which at least one wall (3) is movable in order to increase the volume formed by means of said walls.
