Abstract (en)

[origin: WO2005071191A1] The invention relates to a clip fixing element for rapid assembly of fixture devices such as socket wrench locks, swivel lever locks (10) and hinge parts in openings (12, 14) in a thin wall (16, 50), comprising head part (24) that is to be arranged on the outer side (18) of the thin wall (16) and which covers the outer edge (20) of the opening, a trunk part (26, 28, 30, 32) that penetrates the opening in assembled state departing from said head part and retaining elements (36) which yield in the direction of its outer surface projecting from said trunk part, wherein the free ends of said retaining elements have a slanted surface (38) for providing backlash-free support of the trunk part on the border or edge (40) of the opening of the other inner side (42) of the thin wall (16), wherein, according to the invention, the trunk part (26, 28, 30, 32) and the retaining element (36) are separate parts.
