Abstract (en)

[origin: WO2005070579A2] The invention relates to a line for high-pressure fuel storage, oil or other liquids which are to be used in a common rail fuel injection system. Said line comprises an outer casting covering which is embodied in a tubular manner and which is made of casting material. One or several internal pipe parts are arranged inside the outer covering, and the outer covering is formed by recasting or extrusion coating one or several of the pipe parts.
