Abstract (en)
[origin: WO2005073997A1] The aim of the invention is to integrate a differential current triggering device (8) into a line protection switch (11) while maintaining the line protection switch components (1 - 6). As a result, the differential current triggering device (8) is coupled to a bar (4) in order to actuate a trigger lever (5). The same bar (4) is used to couple a thermal triggering element (2) to the trigger lever (5).
