Abstract (en)

[origin: EP1709904A2] Power measuring device comprises a sole-like element (14) having a sole body (24) with an opening for a bending body (16) and a tread element (28). The bending body is connected to the tread element on one side and to the sole body on the other side using fixing devices (30, 32). Preferred Features: The tread element comprises a first partial element (34) and a second partial element (36) which are each connected to the bending body using the first fixing device (30). The fixing devices are formed as screws or bolts.
