Abstract (en)

[origin: EP1710165A2] The device has a base (11) including an upper side (1), a lower side (2) and base boundary sides. The base is available in any form such as rectangle or circular plate, and is equipped with a recess and a slot. A label (22) specifies a location of an information tag such as bar code or radio frequency identification tag. The label is viewable in a transportation condition from a direction. An independent claim is also included for a method for manufacturing a transport device with a label.
