Abstract (en)

[origin: EP1710189A1] A roll of a consumable material has the material rolled up on the outside of a plastics tubular section (5) with there also being a printed film (7) around the inside of section (5). An independent claim is also included for production of the roll by (A) printing the inside of a plastics tube; (B) covering the printed surface with a protective layer; (C) winding the consumable material on the outside of the tube; and (D) completely cutting through the tube to give individual rolls.
