Abstract (en)

The corner fairing is made of PVC, rubber, linoleum or similar material, and comprises of attached support strip (1) and cover strip (2). The support strip has a flat area formed on another flat area, and an edge that forms a protruding profile (4). The cover strip has a bar (3) or protrusion that is arranged and joined between the ductile bars (5,6) formed on the protruding profile of the support strip. The cover strip is joined over the flat areas of the support strip.
