Abstract (en)

The system has a U shaped groove (10) with a depth (P) formed in an upright (3), and having an inner width (L) between branches (11, 12) of the groove. A U shaped joint (20) has an overall width separating its branches (21, 22) and lesser than the width (L). An inner width of the joint is equal to the thickness (E) of a panel (2), and the overall height (H) of the joint is lesser than the depth. Two key seals (31, 32) are inserted in respective spaces (33, 34) defined between the branches (11, 12) and opposite sides (5, 6) of the panel, when the panel is inserted in the joint in the groove.
