Abstract (en)  
[origin: EP1710822A1] The disconnecter comprises a casing (1) on the interior of which is partially housed an input plate (2) and an output plate (3) the ends of which are connected respectively to the supply and the distribution bus bars of the low-voltage switchboard and contacts (4) and (5) for coupling or uncoupling to the input (2) and output (3) plates. Specifically, the input (2) and output (3) plates are mounted inside the casing (1) in a horizontal position, one over the other, coming out to the exterior of the casing, through its rear part, for input to the supply and the distribution bus bars, in a horizontal position and one over the other.
