Abstract (en)
[origin: WO2005084769A1] A toy vehicle system is provided that includes a first toy vehicle (101). The toy vehicle includes a first body component (103) having an end, a second body (107) component having an end, and a coupling system (117). The coupling system includes a first socket element (119) attached to the end of the first body component, a second socket element (121) attached to the end of the second body component, and an adapter (123) having one end removeably attached to the first socket element and an opposite end removeably attached to the second socket element.
