Abstract (en)
[origin: WO2005071202A1] The invention relates to a door closer comprising a housing (1) for accommodating a locking mechanism. Said housing (1) is provided with screw-on flanges (8, 9) in which fastening holes (10) are disposed in order to pass fastening elements therethrough. In order to design a door closer that can be universally used, three fastening holes (10) are located in each screw-on flange (8, 9).
