Abstract (en)

[origin: WO2005073942A2] The invention relates to a board that can be used especially as a board for a door in offices or administrative buildings. A base body (1) of said board comprises guiding grooves (2, 3) for an information carrier (4), on two opposing edges thereof, and a cover (5). Clamping slides (15) that can be introduced into a central groove (6) of the base body (1) are used to secure the position of the information carrier (4) and the cover (5), at least one of said slides being provided preferably with at least one display panel (23) that can be pivoted back and forth.
