Abstract (en)
According to one aspect thereof, the invention relates to a harness (1) for securing a user, comprising a waist belt (10) connected to two leg loops (20) and a belay ring (30). The waist belt comprises at least one sequence (140) of slits (14) in the lumbar area of the outer covering (13) which are arranged such as to provide an integrated buckle (12) into the covering (13). Each of the leg loops (20) comprises an adjusting system (230) allowing the leg loop to alternatively take a predetermined maximum size and a predetermined minimum size when the latter is subjected to stress. The belay ring (30) comprises a loop (31) adapted to wrap a portion (41) of a carabiner (40).
