Abstract (en)
The support consists of a base with first (7) and second (12) thrust members, the latter supported by an assembly of components providing three functions - lengthwise movement and rotation in two different reference planes. The first thrust member has a closed V-shape, while the second one is open, and the support comprises adjustable components (1, 2, 3) and four separate control members (8, 9, 10, 11), two of which control the position of the open V while the other two rotate it about two perpendicular axes.
