Abstract (en)
The device has a piston guide (13) with a guiding space in which a rammer head is arranged. A propellant (41) stands in connection with the space through a separating unit (31) provided with transit openings (34, 35). The unit (31) is formed as part of a positioning energy adjusting unit (30) and movably supported. The active opening cross section of a part of the openings is changeable based on the position of the unit (31).
